Wreath Sign Attachment Checklist

A quick preparation and final-check sheet to use with the full sign-attachment tutorial.

01 | RECORD THE SIGN

Sign material: _____

Approx. size: _____

Attachment points: _____

Wreath frame / base: _____

02 | PREPARE AND POSITION

- [ ] Inspect the sign for damage, sharp edges, loose parts and existing holes.
- [ ] Check the maker's directions before drilling, piercing or adding adhesive.
- [ ] Dry-fit the sign at the intended height and angle before attaching.
- [ ] Plan connections to a sturdy part of the wreath frame when appropriate.
- [ ] Select fasteners suited to the sign material and its weight.
- [ ] Check that attachment materials will not damage artwork or finishes.

03 | ATTACH AND TEST

- [ ] Fasteners are secured and any sharp ends are tucked away.
- [ ] The sign is stable when the wreath is upright and gently handled.
- [ ] Nothing pulls the frame out of shape or blocks the hanging point.
- [ ] The sign is easy to see once ribbon, mesh and bows are fluffed.
- [ ] Hanging / transport orientation has been checked.

04 | MAKER NOTES
