CHRISTMAS TREE RIBBON CALCULATOR

Calculate tucked pieces, bows, and roll quantities.

Tree height & fullness _____

Visible sides / design theme _____

Ribbon width / pattern _____

Yards per roll _____

Number of tucked pieces _____

Inches per piece _____

Piece yardage: (pieces x inches) / 36 _____

Extra yards for bows & topper _____

Add adjustment allowance and total _____

EXAMPLE: 18 x 24 inches / 36 = 12 yards.

Add 20% = 14.4 yards; buy 2 rolls if each contains 10 yards.

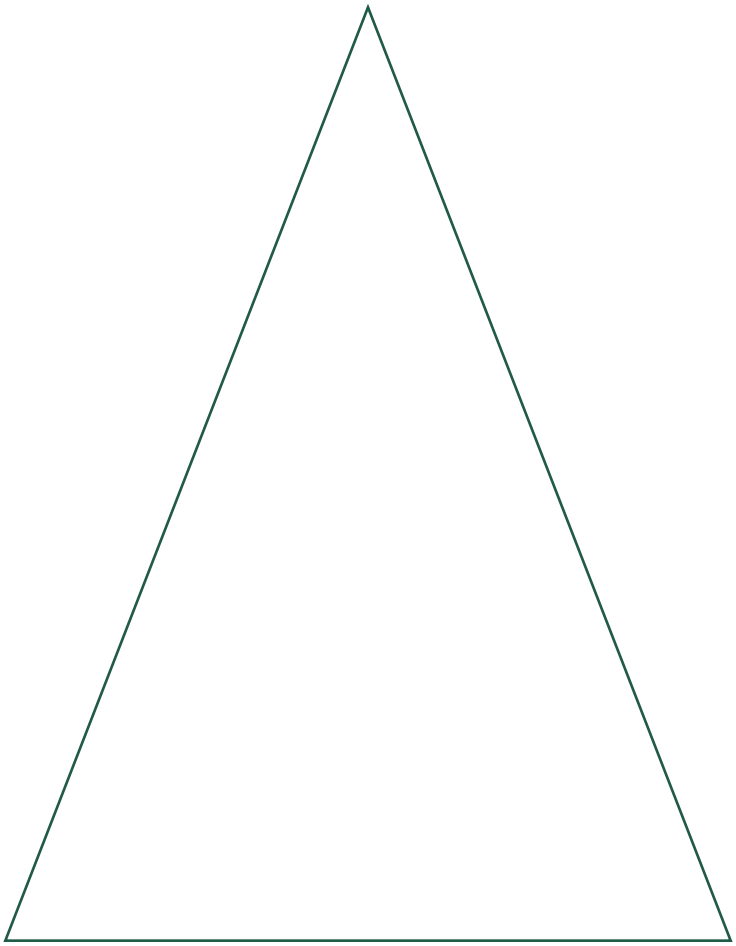

SHOPPING & SETUP CHECKLIST

- [ ] Measure one piece before cutting everything
- [ ] Count bows and their tails separately
- [ ] Double-check the length printed on each roll
- [ ] Coordinate a featured print with calmer accents
