Make a Wreath Bow

Printable schematic | Handmade wired-ribbon bow | Beginner friendly

SUPPLIES

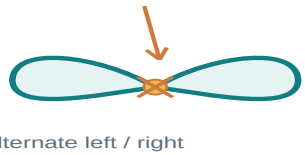

Wired ribbon (2.5 in / optional 1.5 in) + ruler + scissors + wire or stem

1 Leave a tail + pinch

Keep ribbon attached to the spool.

2 Make matching loops

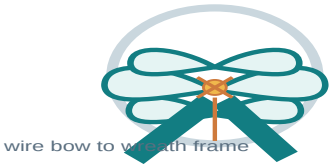

Pinch + twist after each loop.

3 Build + secure bow

Try 3-5 loops per side; wire center.

4 Fluff + attach

Arrange tails; secure to the frame.

GOOD FIRST TEST SIZE (ADJUST FOR YOUR WREATH)

Loop length: about 5-6 in	3-5 loops on each side
Tail length: about 10-14 in	Main ribbon: 2.5-in wired

QUICK REMINDERS

- Twist at each center pinch to keep the printed side facing forward.
- Wrap floral wire or a chenille stem tightly around the pinched middle.
- Thread the securing wire through the frame - do not rely on glue alone.

MY BOW NOTES

Ribbon: _____ Loops/side: _____ Loop length: _____ Tails: _____
